

Memorial policy deserves thanks

On behalf of myself and the other members of the Veterans of San Dieguito High School Memorial group, we want to thank the San Dieguito Union High School board of trustees for their thoughtful consideration and efforts in addressing the issue of an appropriate memorial for those former students killed in the service of our country.

I am particularly impressed with those members of the board who took the initiative to research the types of tributes and memorials that other schools have established across the nation.

It had always been our intent to make this an all-inclusive and fitting tribute to

those who were a visible presence in our community.

We all appreciate that the student representatives on the board were particularly sensitive and understood this concept. The final policy shows a genuine sensitivity to the community and the families and friends of those lost. We look forward to working with the board, the students and the district staff in the completion of this project.

I am taking the liberty to provide each board member the more relevant sections of the bylaws of the association that has been organized to bring our mutual goals to fruition. It is hoped that these will give all those involved a clearer insight into our goals and objectives.
